

# Smart Farming Using IoT

## Team ID : PNT2022TMID32030

What do they  
**THINK & FEEL?**

Farmer should be in the farm field to monitor their crop field  
To save crop need to be smart.

What do they  
**HEAR?**

what is farmer able to monitor and control crop and irrigation remotely  
To save Time for farmers

What do they  
**SEE?**

Farmers not able to go out for emergency purposes  
they wasting time by monitoring the crops

What do they  
**SAY & DO?**

To create an technology to control crop irrigation  
To natvigate easily

### PAINS

It has false reports and less accuracy  
Farmers are wasting their time by monitoring and irrigating crops

### GAINS

lot based agricultural system help the farmer in monitoring different parameter of a field like soil moisture , temperature , Humidity etc using some sensors
